SCHOOL SECURITY SYSTEMS

Entry-Master Systems has been providing card access and security solutions to both public and private educational institutions since 1988. These institutions include elementary and secondary schools as well as university campuses.

Johns Hopkins University is a world-class institution that has been utilizing Entry-Master to secure its campuses and provide a safe environment for its students and faculty for over 25 years.

Our software can be customized to provide an integrated card access and video surveillance system in a Web-enabled environment. You can access your system remotely with a cell phone or through a PC in a standard browser.

Entry-Master card access systems can integrate with most industry standard hardware.

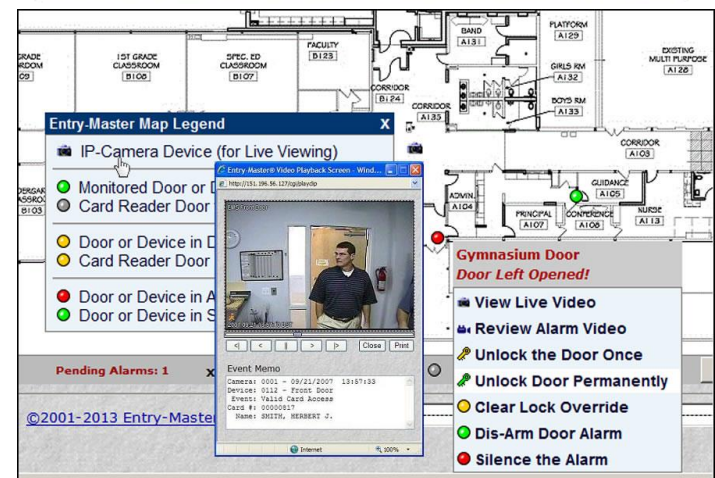

Entry-Master System Features:

- Customized Card Access Control
- CCTV and IP-Camera Monitoring
- Real-Time Monitoring of Facility via Digital Map
- Mass Notification Integration
- Interior Gate Control and/or Metal Detectors
- Classroom Door Monitoring
- Wireless door and motion detection integration

Benefits:

- No Recurring Software Fees
- No Seat Licenses
- Integrates with most industry standard hardware
- Works with Windows, Mac and Linux
- Virus-Proof and Hacker-Resistant

For More Information, Contact:

Entry-Master mapping capabilities allow you to see all security points of your facility. You can control each door or entry point, get a live view from each camera or lock down any point with the click of a mouse.
