SPECIFICATIONS: OPTION-2

The Option-2 System

The **Entry-Master® Option-2 System** is a stand-alone starter card access control system that grows with your company. If your office has only 1 or 2 doors you can have a fully operational, Windows-based card access system. Additional panels may be added to increase the number of readers to eight. Then, as your security needs grow, the Option-2 system can be easily upgraded to cover hundreds of doors. All of the Option-2 hardware seamlessly merges with any of the **Entry-Master** web-based family of products.

Option-2 PLUS Upgrade

When you need a 4 to 8 eight door system, the Option-2 Plus upgrade is easily added to the **Entry-Master** **Option-2 System**. Install additional system enclosures (pictured above) and you can expand your security coverage to eight (8) readers. No new software is required.
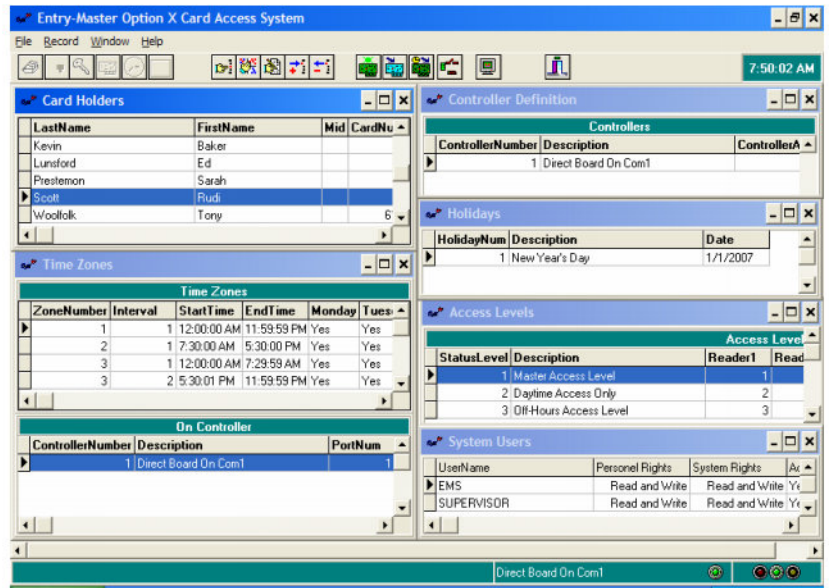

Option-2 Capabilities

- **Control personnel access by cardholder, group, door, time, date and location**
  You can customize your security to limit access to certain individuals by time (cleaning crew from 6pm to 8pm) or by location (server room accessible to I/T personnel only).

- **Lock and unlock doors based on scheduled time of day and/or day of week**
  Unlock the front lobby door from 8am to 5pm Monday through Friday for public access, but require a valid card to enter the front lobby after regular business hours.

- **System can be programmed and operated using a dial-up modem or ethernet**
  Cardholders can be added and deleted, new personnel settings updated - you have complete control of remote locations from your desktop or laptop computer.
